A place for conversation.

The SideTable visual identity

A small table. Three chairs. An open invitation.
SideTable is a desktop client for apron.chat. Its mark draws on the familiar arrangement of a neighborhood bistro table.

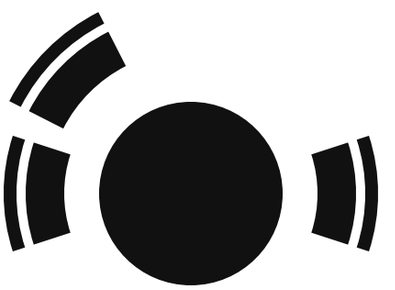

The logo system

One identity, three practical configurations.

01 PRIMARY / STACKED

02 SYMBOL

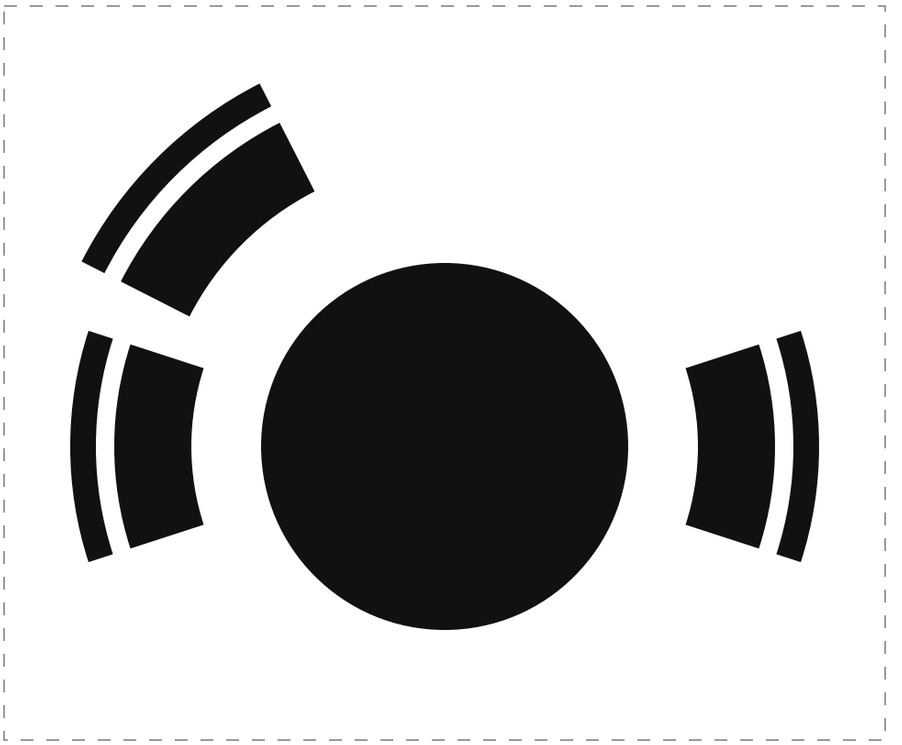

03 HORIZONTAL / COMPACT HEADERS

Use the stacked logo for introductions and covers.
Use the horizontal logo in navigation and narrow layouts.
Use the symbol for app icons, avatars and familiar contexts.

Geometry & breathing room

Keep the arrangement intact.

The approved asymmetry is intentional: two chairs at the left, one at the right. The upper-left chair sits slightly farther out. This release preserves that offset; it is not strictly concentric.

Leave at least half the table radius clear around visible artwork. Recommended minimums: symbol 32 px; stacked logo 160 px; horizontal logo 240 px. Use the supplied micro favicon at 16-24 px.

Color & typography

A monochrome foundation.

INK

#111111 / RGB 17, 17, 17

PAPER

#FFFFFF / RGB 255, 255, 255

Poppins SemiBold

Poppins Regular

The generated wordmark had no identifiable font source. The production wordmark is rebuilt with Poppins SemiBold and exported as outlines, so no font installation is required.

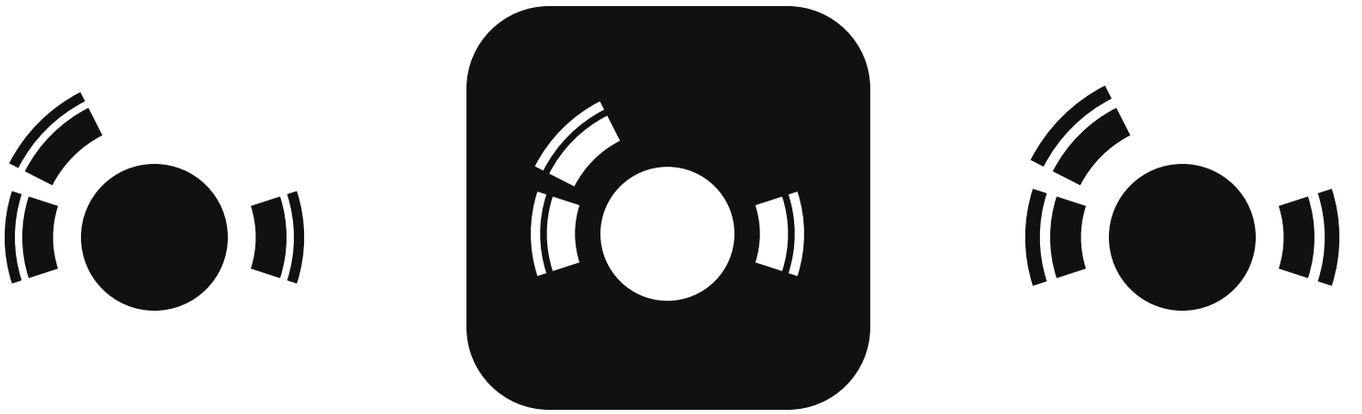

For supporting copy, use Poppins Regular or the platform system sans-serif. Keep the name spelled SideTable with both capitals.

Use Ink on white and the white logo on Ink. Keep the mark single-color. Earlier wood, gingham and flower concepts are not part of this release.

For one-ink print, map Ink to 100% black rather than rich black. Fonts are not bundled; logo SVGs contain paths, not live text.

Application & small sizes

Select the file that matches the surface.

DESKTOP

macOS: SideTable.icns plus editable iconset source.

Windows: SideTable.ico with 16-256 px representations.

WEB & MOBILE

SVG for responsive sites; PNG for fixed raster placements.

Full-square app masters have no baked corner mask. Let the platform apply its shape. A separate maskable PWA icon is included.

Mobile PNGs are flat inputs, not complete platform asset catalogs.

SOCIAL

Use the 1080 px avatar for profile pictures. Use the 1200 x 630 px share image for link previews and the 1080 px square for posts.

Avatars have padding for circular cropping.

At tiny sizes the micro icon strengthens chair backs and gaps.

Avoid shrinking a wordmark into a favicon.

Use & handoff

Keep the identity simple and consistent.

DO

Use the supplied vector masters whenever possible.

Keep proportions, spacing, chair positions and orientation intact.

Use white artwork on dark backgrounds and black on light.

AVOID

Do not rotate, stretch, outline or rearrange the symbol.

Do not add textures, checks, flowers or shadows to this version.

Do not use the white transparent files on a white surface.

PACKAGE MAP

vector/ SVG and PDF masters, with outlined lettering

png/ Transparent logo and mark exports

apps/ macOS, Windows and mobile image assets

web/ Favicons, touch icon, PWA files and HTML snippet

social/ Avatars, square post and link-preview images

guide/ This document

source/ Geometry specification and provenance notes

Production note: this is a clean vector reconstruction of the approved generated concept, not a pixel-identical tracing.

See README.txt for export dimensions and implementation notes.
