Warmth, with a little energy.

Golden yellow + espresso brown

SideTable

A small table. Three chairs. An open invitation.
SideTable brings the warmth of a neighborhood bistro to a desktop client for apron.chat. Yellow adds energy; espresso keeps the identity grounded.

The signature palette

Two core colors. Clear roles.

GOLDEN YELLOW

#FFD23F

RGB 255 / 210 / 63

Primary brand field: app icons, social avatars, covers and highlights.

ESPRESSO BROWN

#3B2118

RGB 59 / 33 / 24

Primary foreground: symbol, wordmark, text and dark surfaces.

White (#FFFFFF) is a supporting neutral for reading surfaces.
Keep the symbol and wordmark in one color within each placement.
Do not split individual chairs into different colors.
For print, convert through the printer's color profile and approve a proof;
these HEX and RGB values are the digital color references.

Logo & background pairings

Use contrast to keep the table unmistakable.

PRIMARY / ESPRESSO ON YELLOW

REVERSED / YELLOW ON ESPRESSO

On white: use espresso for the symbol and wordmark.
On espresso: yellow is the preferred brand treatment; white is optional.
For one-color reproduction: retain black-on-white or white-on-black.
Avoid white-on-yellow and yellow-on-white; the edges lose definition.
Espresso and golden yellow have a calculated contrast ratio of 10.27:1.

Shape, spacing & type

Keep the approved silhouette intact.

Keep the three-chair asymmetry and the smaller circular tabletop.
The upper-left chair retains its approved slight outward offset.
Leave at least half the table radius clear around the visible artwork.

Suggested minimum widths: symbol 32 px; stacked logo 160 px;
horizontal logo 240 px. At 16-24 px, use the reinforced micro symbol.

Wordmark: Poppins SemiBold, supplied as vector outlines.
Supporting text: Poppins Regular or the platform system sans-serif.
Always write SideTable with a capital S and T.

Make the color recognizable

Examples for apps, websites and social profiles.

PRIMARY APP ICON

DARK ALTERNATIVE

AVATAR

Use the yellow field and espresso symbol as the default app identity.
Keep generous padding for circular avatar crops and platform masks.
The rounded corners above are display examples, not a mandatory mask.

For websites, use white or espresso for large reading areas and yellow for memorable brand moments. Use espresso text on yellow buttons.
Keep functional status colors separate from the brand palette.

A consistent handoff

The working rules for version 2.0.

DO

Use espresso on golden yellow as the signature combination.
Use yellow on espresso for dark branded surfaces.
Preserve geometry, orientation and spacing in all exports.
Prefer SVG or vector PDF for scaling; export PNG at the required size.

AVOID

Do not stretch, rotate, rearrange or outline the symbol.
Do not add wood grain, gingham, flowers, shadows or gradients.
Do not use white artwork on the yellow background.
Do not substitute pure black for espresso in the primary color version.

QUICK REFERENCE

Background: golden yellow #FFD23F
Foreground: espresso brown #3B2118
Supporting neutral: white #FFFFFF
Wordmark: Poppins SemiBold / supporting copy: Poppins Regular

This guide supersedes the monochrome palette guidance in version 1.0.
The approved logo geometry is unchanged. The version 2.0 export kit includes color logos, icons, social images and agent guidance.
Black and white exports remain available as monochrome fallbacks.
